

JAX webinar series

Key Differences among B6 Substrains and the Research Impact

Sarah Edie, Ph.D.

Technical Information Scientist, The Jackson Laboratory US

Dear Researcher,

We are glad to announce webinar series in association with JAX. During this webinar, the speaker will discuss on considerations for choosing and using the most appropriate B6 substrain for your research needs. Join us to learn about:

- The development of B6 inbred mice and emergence of different B6 substrains
- Recent publications highlighting significant physiological and behavioral differences among different B6 substrains
- The importance of selecting the best B6 substrain to use as a control
- Advice for avoiding common research mistakes using B6 mice

Date: 29 January 2021, Friday

Time: 10:00am to 11:00am SGT

Platform: Microsoft Teams
